FULL STACK DEVELOPER | JAVA • ANGULAR • REACT

PROFESSIONAL SUMMARY

Full Stack Developer with 8+ years of experience in web application development, with a strong front-end background in React, JavaScript, TypeScript, and modern UI frameworks. Project experience includes financial services, insurance, healthcare, e-commerce, and content management systems. Familiar with Java, Spring Boot, REST API integration, and SQL as reflected in the project profile. Experienced in requirement analysis, reusable component design, API integration, unit testing, debugging, code reviews, and collaboration with cross-functional teams.

CORE TECHNICAL SKILLS

Front End: Angular, React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Angular Material, Material UI, PrimeReact

Back End & Integration: Java, Spring Boot, REST APIs, GraphQL

Database: SQL, MySQL

CMS & Libraries: Sitecore, jqWidgets, D3.js

Tools & Collaboration: VS Code, IntelliJ IDEA, JIRA, Confluence, Git, pull-request reviews

Testing: Unit testing, Jest, debugging, functional validation

PROFESSIONAL EXPERIENCE

Technical Specialist | Zensar Technology, Pune
July 2023 – Present

Contributes to finance, healthcare, and e-commerce applications for international clients; works with delivery teams on application development and AI-enabled solutions.

Senior Software Engineer | Zensar Technology, Pune
June 2021 – June 2023

Worked primarily on front-end development using React and JavaScript, building and maintaining user-facing application features.

Software Developer | AnAr Solutions, Pune
November 2018 – June 2021

Worked on front-end development using React, JavaScript frameworks, and jqWidgets.

SELECTED PROJECT EXPERIENCE

Standard Bank — Banking & Financial Services
Client: Standard Bank, South Africa | Team size: 80

Banking and financial services application supporting customer information, banking operations, and financial workflows.

- Participated in client discussions, requirement gathering, and functional analysis.
- Developed responsive UI components using Angular, TypeScript, HTML5, CSS3, and Angular Material.
- Implemented Angular components, services, routing, data binding, and form validations.
- Integrated REST APIs with Java-based backend services; project profile lists Java, Spring Boot, SQL, and MySQL.
- Collaborated on debugging, application performance, code quality, Git, and JIRA workflows.

Technologies: Angular, TypeScript, HTML5, CSS3, Angular Material, Java, Spring Boot, REST APIs, SQL, MySQL, IntelliJ IDEA, VS Code, JIRA, Confluence, Git

Sanlam — Insurance / General Lead Generation
Client: Sanlam | Team size: 12

Insurance lead-generation application for capturing, managing, and processing customer leads and supporting lead-tracking workflows.

- Participated in client discussions, requirement gathering, and functional analysis.
- Developed reusable UI components using Angular, TypeScript, HTML, CSS, and Angular Material.
- Worked on lead generation, lead tracking, and customer data management modules.
- Integrated REST APIs and collaborated with backend developers on business workflows.
- Assisted with form validation, debugging, testing, and issue resolution.

Technologies: Angular, TypeScript, HTML5, CSS3, Angular Material, REST APIs, Java/Spring Boot (as listed in supplied resume), SQL/MySQL (as listed in supplied resume), VS Code, IntelliJ IDEA, JIRA, Git

Macy's MAS-CM — Content Management System

Client: Macy's, US | Team size: 18

CMS development and maintenance, including modernization of legacy front-end modules and reusable components.

- Participated in client calls, requirement gathering, technical discussions, and analysis.
- Led front-end activities and developed reusable, scalable UI components.
- Contributed to migration of legacy AngularJS modules to modern front-end architecture.
- Built a widget-based CMS that enabled non-technical users to manage and configure content dynamically.
- Integrated REST APIs; performed unit testing, debugging, pull-request reviews, and code-quality checks.

Technologies: React, Next.js, TypeScript, HTML5, CSS3, Material UI, PrimeReact, Sitecore, REST APIs, VS Code, JIRA, Confluence, Git

Beckman Coulter

Client: Beckman Coulter, US | Team size: 15

Developed MTD shopping-cart functionality for diagnostics and life sciences.

- Worked on checkout, software downloads, and My TechDocs functionality.
- Managed the front-end module and built reusable widget-based systems.
- Designed scalable front-end architecture and supported requirement analysis, unit testing, and PR reviews.

Technologies: React, TypeScript, HTML, CSS, Bootstrap, Sitecore, Coveo, VS Code, JIRA, Confluence, Git

Sky Connect

Client: Sky Business Broadband, UK | Team size: 50

Supported the broadband website with sales improvements, A/B testing, campaign support, and feature delivery.

- Worked on checkout and add-on designs and developed user-friendly plan-selection journeys.
- Conducted A/B tests and experiments and built reusable widgets for non-technical users.
- Supported requirement analysis, development, unit testing, PR reviews, and experimentation.

Technologies: React, TypeScript, HTML, CSS, Bootstrap, GraphQL, VS Code, JIRA, Confluence, Git

RICS — Financial Services (UK)

Client: Royal Institution of Chartered Surveyors | Team size: 26

Developed application features for CPD creation, updates, bulk uploads, and single sign-on (SSO).

- Integrated SSO for seamless access across multiple sites.
- Conducted unit testing using Jest and supported Azure-based deployments.
- Designed reusable front-end architecture for scalability.

Technologies: React 17+ (Hooks), HTML, CSS, Bootstrap, .NET, Azure, Jest

Medius Health

Client: Medius Health, Australia | Team size: 4

Web-based healthcare application using AI for insurance recommendations and health-risk predictions.

- Collaborated in daily stand-ups with managers and UX designers to prioritize tasks.
- Designed reusable front-end architecture and widget-based systems.

Technologies: React (Hooks), HTML, CSS, Bootstrap, Python, REST APIs

Credo Wealth Management

Client: Credo Wealth, UK | Team size: 5

Web-based financial application for portfolio and wealth management.

- Developed reusable front-end modules and widgets for seamless integration.

Technologies: React, HTML, CSS, Bootstrap, .NET

EDUCATION

PG DAC — CDAC Pune (2015–2016) | First Class

Engineering, Information Technology — Pune University (KBTCOE, Nashik) (2012–2015) | First Class

Diploma, Information Technology — Government Polytechnic, Jalgaon (2009–2012) | First Class with Distinction

SSC — Vivekananda Vidhyalay, Chopda (1999–2009) | First Class with Distinction

ADDITIONAL INFORMATION

Languages: English, Hindi, Marathi

Interests: Visiting natural places, travelling, reading books, playing chess

Declaration: I declare that the information provided above is true to the best of my knowledge.
